EDUCATION

University of Central Punjab, Lahore   **Oct 2020 – July 2024**
● Bachelor of Computer Science

Punjab Group Of Colleges, Lahore,   **Oct 2018 – May 2020**
● Intermediate in Computer Science

INTRODUCTION

I'm a final semester BSc Computer Science student specializing in full-stack web development. I've achieved Level 2 Seller status on Fiverr, successfully completing over 70 tasks/projects with consistent 5-star reviews. Additionally, I interned at Coduko, contributing to Helpknx.com by developing significant features for its platform. My final year project involves creating a cybersecurity bot using a deep learning model and Raspberry Pi to detect network threats. These experiences have honed my skills in software development and project management, readying me for a career in innovative tech environments

WORK EXPERIENCE

FIVERR   **Mar 2023 - Present**

Level 2 Seller, Full Stack Web Developer (Php Laravel)
● **Achieved** Level 2 Seller status on Fiverr within one year through exemplary project delivery and client satisfaction, demonstrating advanced proficiency in web development.
● **Enhanced** website performance for clients by integrating efficient database solutions and optimizing server-side code, resulting in a 50% reduction in load times on average.
● Delivered over **70** full-stack web development projects, including new builds, feature enhancements, and bug fixes, using PHP and Laravel

CODUKO   **Dec 2022 – Feb 2023**

Intern, Associate Software Engineer
● Contributed major enhancements to user dashboard functionalities for **Helpknx.com**, a service-oriented platform connecting chefs with job opportunities in the USA.
● **Integrated** multiple third-party APIs and implemented **Cron Jobs** to automate routine tasks, significantly improving operational efficiency and user engagement.
● **Engineered** robust features for a high-traffic web application, focusing on scalability and security to support growing user demand and data integrity.
